17-3391-A

Location

Suffolk, Elizabeth is based in Suffolk and has a 2hour capture area

Clinical Skills and Expertise

For over seventeen years Elizabeth has worked in a wide variety of clinical settings, notably brain injury and orthopaedics and more recently paediatrics. This has given her expertise in assessing the functional, vocational and psychological impact of injury both in the community and hospital setting. She is a very competent clinician in thorough assessment and treatment planning for both urgent and rehabilitation referrals. Due to her many years of experience she has developed an excellent understanding of when NHS pathways may need supplementing with additional treatment. Elizabeth has developed expertise in all of the following areas:

- **Neurological conditions**
- **Complex orthopaedic Rehabilitation**
- **Paediatric neuromuscular conditions**
- **Traumatic brain injury**
- **Vocational rehabilitation**

Key Case Management Skills:

- Excellent knowledge of local services
- Able to maintain effective working relationships with clinical teams within the NHS
- Good knowledge of partnership working with statutory, private and voluntary organisations
- Effective advocate for clients
- Excellent communication skills allowing her to develop good rapport with clients, families and stakeholders
- Able to quickly build a holistic understanding of client and other stakeholders needs
- Applies evidence based practice in goal setting
- Able to take on a leadership role as well as working within a team

Personal Profile

Elizabeth qualified as an Occupational Therapist in 2000 and since this time has worked in the NHS and the voluntary sector. She has also spent time as an Occupational Therapy Lecturer at the University of East Anglia where she lectured on clinical reasoning and vocational rehabilitation amongst other related subjects.

The skills Elizabeth has developed are readily transferable in her case management work where a clear focus on outcomes and a good knowledge of local services enable effective rehabilitation for her clients.
